Sunburst Software Solutions, Inc. Launches Enhanced Application to Share Data with QuickBooks® 2004 Products.

Construction Application for Payment Solution's Integration with QuickBooks® Helps Businesses Save Time & Money!

West Charleston, VT - November 14, 2003 - Sunburst Software Solutions, Inc. today announced that Construction Application for Payment Solution (CAPS) will now share data with Intuit's QuickBooks® Pro/Premier Editions 2004, and Enterprise Solutions 4.0. This exchange of critical data from Estimates, Progress Invoices, and Job Records in QuickBooks® with CAPS allows contractors to quickly and efficiently generate modified AIA type billings on plain paper or on actual AIA documents that are purchased and fed into the printer. This process will help small businesses who use both products to manage their business more efficiently - saving them valuable time, money, and resources.

"Construction Application for Payment Solution (CAPS) is a perfect fit for companies that want to combine the ease-of-use of QuickBooks® with effective industry-specific billing protocols" says Nancy Smyth, President of Sunburst Software Solutions, Inc. "We launched the original version of CAPS in January, 2002; and, we have seen an incredible response to the product. This new release includes the option to print on original AIA Forms G-702® and G-703® and includes expanded functionality for taxable contracts. This new release reaffirms our continued commitment to deliver the best available tools and technology to our customers."

Construction Application for Payment Solution is an affordable tool that allows users to easily create, organize, and retrieve their project billing information and generate it without risk of transposition errors in a mandated industry standard format and is currently being used by General Contractors, Developers, and Subcontractors in a wide variety of industry-specific situations.

"The sharing of data between applications such as CAPS and the QuickBooks® 2004 products helps small businesses avoid having to manually enter the same data in both applications, which takes a lot of time and can result in data entry errors," said Mark Berrow, Vice President of the Intuit Developer Network. "Sunburst Software Solutions, Inc. is a perfect example of how Intuit Developer Network Members are successfully using the QuickBooks® SDK to bring valuable applications to Intuit's small business customers. The Intuit Developer Network will continue to help members like Sunburst Software Solutions, Inc. to address small businesses' needs for easy-to-use products that are integrated and customized for their specific business requirements."

Sunburst Software Solutions, Inc. provides easy to use technology solutions for the construction industry.
